***Election of species***

1. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species(e.g. specific example in the specification), from under the instant claims of the elected group. Moreover, whatever specific compound is ultimately elected, applicants are required to list all claims readable thereon. With the election of a specific exemplified compound, a generic concept will be identified by the examiner as the inventive group for examination.

Upon the election, applicant is subject to further election of species requirement for the patentably distinct species of skin conditions. For example, Claims 16-30 recites various skin condition which is considered to be different diseases from one to the others because each skin condition caused by different etiology and the treatment could be different , as evidenced by numerous documents.

Upon the election, applicant is subject to further elect the patentably distinct species of enhanced combination which is recited in claims 13-14. It is noted that a reference to one enhanced combination of drugs would not be a reference to another combination of drugs under U.S. C. 103. Further, the claims read on a multitude of enhanced combinations of drugs which would require many field of searches that would be an undue burden on the examiner. Therefore, restriction for examination purposes is proper.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed(37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Conclusion***

1. all the claims 1-31 are subject to the election of species requirement.
